

Administrative Amendment:

Administrative amendments are straightforward changes to the protocol which do not affect animal use or welfare. They are to be reviewed and approved by the UACC Coordinator (with consultation of the UACC Chair and University Veterinarian as required). Administrative amendments are usually assessed within 2 -3 days of submission.

Examples:

- x Change in personnel (addition or removal of protocol associates including students)
- x Change in title
- x Change in funding source or account information provided it does not impact scientific peer review
- x Adding/removing strain /sex/breed (SSB)

- x Change in drug(s) used, where the effects on the animal are equivalent
- x Change in the anesthetic agent used or in the use of analgesic agents (the degree of difference in efficacy, titration and difficulty in administration of the agent will be considered)
- x Change in method of euthanasia (change from a recognized to a new or not normally recommended method will usually require review by the full UACC)
- x Change to a live-animal
