

Executive Summary:

Topic and Purpose

Implementation of park amenities and public space help create an outdoor meeting place for civic events, markets, socialization and offer a wide

Bridge Park and West Don Lands provided excellent examples of design features that help create successful parks and public spaces. From environmentally friendly design to preservation of culture and heritage, these case studies helped this report identify successful design features which create parks and public spaces that consistently attract a wide array of visitors. These case studies guided recommendations made in this report for the City of Vancouver to use in its future design plans for the proposed study area.
