Entry requirements:

PSYC 205/3.0 or PSYC 271/3.0 and PSYC 370/3.0 (or PSYC 272/3.0) course assumes prior obtained knowledge of basic neuroscience and psychopharmacological concepts. Students are expected to remember / recall basic information gained from the prerequisite courses. Those students who do not meet the entry requirements need to spend more time in the beginning on catching up with basic readings, using e.g. reading material used in the entry courses (e.g. Brain and Behavior I and II).

Course Goals and Objectives

In the first part of this course, literature on basic brain and pharmacological mechanisms will be discussed. Next

help prepare for their seminar. Seminar presentations should last approximately ~~25~~ 30 min with an additional 5-10 minutes for questions. You will be marked on the content, organization, and presentation style of your seminar. The content of the seminar should be based on text books and recent articles from major journals in psychology and psychiatry. You will also submit a ~~2~~ 3 page summary of your topic (double spaced)
