

Psychology 100: Principles of Psychology

6.0 units; Fall & Winter 2019-2020

Online

Queen's University

Instructor: Meghan Norris, PhD

PSYC100 Program Associate: Valerie Wood, PhD

PRE-REQUISITES AND EXCLUSIONS

There are no pre-requisites for this course. Note that this course has the following exclusions: EXCLUSION(S): PSYC 101/3.0; PSYC 102/3.0; PSYC 103/3.0

COURSE LOCATION

This is an online class. Though the course has no formal lecture meeting time, this course is not self-paced. The deadlines are firm, and exams are proctored in-person. Online proctoring is not available for this course.

ACKNOWLEDGEMENT OF TERRITORY

Let us acknowledge that Queen's is situated on traditional Anishinaabe and Haudenosaunee territory. We are grateful to be able to be live, learn and play on these lands.

To acknowledge this traditional territory is to recognize its longer history, one predating the establishment of the earliest European colonies. It is also to acknowledge this territory's significance for the Indigenous peoples who lived, and continue to live, upon it and whose practices and spiritualities were tied to the land and continue to develop in relationship to the territory and its other inhabitants today. The Kingston Indigenous community continues to reflect the area's Anishinaabek and Haudenosaunee roots. Individual differences, social psychology and abnormal psychology.

for students on an individual voluntary basis. Students are encouraged to participate in up to five hours of research experimentation.

This is the online version of this course. In this version of the course, students will have weekly online readings and lessons, weekly assignments, and online lectures spaced throughout the course that are targeted to student questions. We have included these components to help you keep up with course content, and to promote deeper thinking and better learning through working with your classmates. This course requires your active participation throughout the course.

We expect that you will be available via high-speed internet on key dates where your engagement is required. If you have a disability or serious personal problem, it is your responsibility to contact the Disability Services Office at PSYC100D@queensu.ca as soon as possible (see the Accommodation for Disability, and Academic Consideration sections below for more information).

For students who will be out of Canada for any part of this course, please note that we have had instances in the past where certain Web sites that are required to complete the online courses, including onQ, have been blocked intermittently in some countries (e.g., China). We do not make

ASSESSMENTS

This course includes a variety of assessment types:

Assessments

Component	Weight (%)
December Exam	30%
April Exam	40%
Lecture Engagement Quizzes	5%
Weekly Online Labs	10%
Fall Peer-Review Assignment	7.5%
Winter Peer-Review Assignment	7.5%
Bonus Research Participation Opportunities	5%
TOTAL	100% + 5%

Note: Students must pass the exam component to pass this course.

Note: Missing more than 7 weekly labs will result in an automatic failure of this course.

Note: Bonus points cannot change a failing grade into a passing grade

([DPV

There will be 2 exams in this class: one in December, and one in April. These exams must take place at an approved testing centre: online proctoring is not available in this class.

The exams are 3 hours in length, and may include multiple choice, true-false, and matching-type questions, in addition to written-answer questions. All material in this course is testable including lectures, online lessons, videos, and assignments.

The April exam, although more heavily weighted on the winter content, will include questions that require integration of content from both semesters.

Details on the exam format, along with study guidance, will be released in the course. It is recommended that students connect with Student Academic Success Services early in the academic year for support in developing strong study habits.

Students receiving permission to write a deferred ònal exam will be expected to write their exam during a deferred exam time, with time, date, and location TBA. Requests for individualized deferred exam dates cannot be accommodated.

Students are required to pass the exam component of the course to receive a passing grade. If a student does not pass the combined exam component, they will fail the course. The midyear exam is worth 30%, the ònal exam is worth 40%, so students must achieve a minimum of 35 marks on the combined midterm and ònal exams to meet this requirement.

Once the exam schedule has been ònalized, the exam date will be posted on your SOLUS account. Students living in the Kingston area will write their ònal exam on Queen's campus. Students writing off campus will receive an email to their Queen's email account with full details of date/time/location of their exam. Please note: off campus exams will be held on the same day as Kingston exams, but the start time may vary slightly due to the requirements of the off-campus exam centre.

When you registered for the course, you indicated the exam centre location. If you do not remember the exam location you chose, or if you wish to change your exam location, please email: aso.exams@queensu.ca or call 613-533-3322. The deadline for changing your exam centre can be found on the Queen's Arts & Science Online website. You must request the change prior to this deadline or you will be subject to a non-refundable administrative fee of \$100.00 per exam.

: HN02Q

This course has required weekly online lab activities and assignments. They are designed to be "2n

Research is an important activity that directly impacts science and society, and that also impacts a larger system (e.g., time in lab space is very limited and can be costly—for example, booking a 1 hour session in the fMRI facility costs \$400). We thank you in advance for ensuring that you attend your scheduled sessions, and that you follow up with the researcher as soon as possible if you miss a session due to extenuating circumstances. TURNITIN STATEMENT

This course makes use of Turnitin, a third-party application that helps maintain standards of excellence in academic integrity. Normally, students will be required to submit their course assignments through onQ to Turnitin. In doing so, students' work will be included as source documents in the Turnitin reference database, where they will be used solely for the purpose of detecting plagiarism.

Turnitin is a suite of tools that provide instructors with information about the authenticity of submitted work and facilitates the process of grading. Turnitin compares submitted files against its extensive database of content, and produces a similarity report.

	Last day to submit Fall exam accommodation requests (if applicable)
