

A Mathematical World

Lyrics: Morgan Evraire

Sung: Morgan Evraire and Sara Da Silva

Music: Disney's "A Whole New World"

Let me show you a world
Counting, rounding, expanding,
Tell me students, now when did
You last solve an equation.

Numbers open your eyes
To different operations
Addition, subtraction, division,
And multiplication too

A mathematical world
Borrowing, carrying, trading
Multiplication charts
And times tables
Inverse operations

A mathematical world
Great lesson plans I never knew
Now that I'm here in class
I'm sure to pass
Now that I'm in a math filled world with you
(Now I'm in a math filled world with you)

Absolute value
Imaginary numbers
Vertical, horizontal,
It just makes so much sense!

A mathematical world
(One, two, three, four, and five)
A hundred thousand possibilities
(Hold your breath it gets better)
I can learn to tell the time
and number lines
Or learn the shapes in Geometry

A mathematical world
(There are charts made of pies)
Let's not forget the counting trees
(It gets better and better)
Circles, triangles, and squares

Shapes we can compare
Let me share this math filled world with you

A mathematical world
(A mathematical world)
Lines of symmetry
(Lines of symmetry)
You don't have to erase
Learn at your own pace
The strategies
