In the beginning there was 1

Going on forever is what they do best ^ ' Z u] v } v Z v '} μ [oo μ v o μ These include , and square root 2 These are called the IRRATIONAL NUMBERS }v[i}]v Z u `] Z Z UΖμΖ There are more numbers out there > [] \vee \circ μ Z u \vee u I] (] J This next group joins everything as one o v Z] Z] [} v Natural, whole numbers, integers, All of these together gives the REAL NUMBERS There are more numbers out there /[000] $^{\circ}$ μ $^{\circ}$ $^$
