Dr. Anthony Sanfilippo  
Undergraduate Medical Education

Education, research, patient care and service

Dr. Anthony Sanfilippo, Associate Professor, Department of Medicine

Medical  
Education

Medical Education is a broad-based discipline that encompasses all aspects of medical education, from basic science to clinical training, and from undergraduate to postgraduate levels.

Medical Education is a broad-based discipline that encompasses all aspects of medical education, from basic science to clinical training, and from undergraduate to postgraduate levels. It involves the development and delivery of educational programs, the assessment of student performance, and the evaluation of teaching methods and outcomes. The field of Medical Education is constantly evolving, with new research findings and educational theories being applied to improve the quality of medical education.
